

Designing with Wood Chips

- Dump the chips on the table and see how they fall
- Organize the chips into different combinations, make the composition easier to read, creating more appeal because of its simplicity
- Take 5-6 of the chips of contrasting sizes and shapes and organize them into a combination – move around the desk to see it from different perspectives

Designing Characters with Wood Chips

- Go to a peer's desk and sketch out a character based off of how the wood chips fell
- Move the wood chips into different body positions
- Move to a peer's desk and sketch out a rough form of a character, based off of the wood chip layout
